

Where Ductless & Traditional Systems Unite

Introducing the Carrier Ductless Single Zone Hybrid Solutions

Carrier

Say Hello to Hybrid Performance & Comfort

It's no secret that ductless and traditional HVAC systems each have their own set of advantages. So why not reap the benefits of both? You can with Carrier Ductless Single Zone Hybrid Solutions.

That's right—the quiet operation, small footprint and enhanced efficiency of ductless and the high performance of traditional units. All in a single, uniquely hybrid system.

Features & Benefits

-  Achieve up to 20.5 SEER and 12.0 HSPF (based on unit size and type)
-  Inverter compressor operates as a variable speed system
-  Off-the-shelf combinations, using already-available Carrier units
-  Built-in base pan heater
-  Available in outdoor unit sizes 12k-36k
-  Leverage patented 24V Interface technology
-  Third-party thermostat compatibility

Off-the-Shelf Combinations for Enhanced Convenience

There are two hybrid options. Both connect the 38MA*R Ductless Single Zone Outdoor Unit to a Carrier residential indoor unit via our 24 Volt Interface technology. And they're 100% off-the-shelf, using products you already have in stock—so you won't have to order, and wait for, new units and parts.

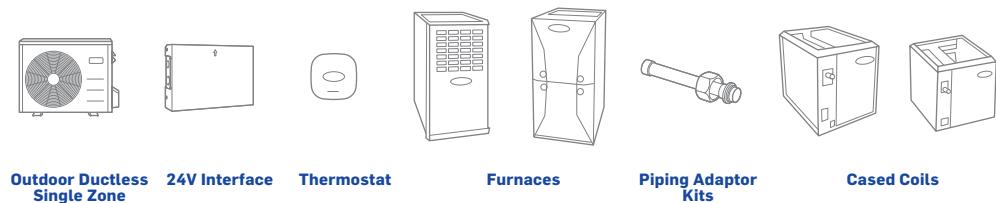

Hybrid Solution with Conventional Fan Coils

Uses electric—best in environments where high heating capabilities aren't required.

Hybrid Solution with Furnace / Cased Fan Coils

Uses gas—best for colder climates where extreme heating performance is necessary.

AHRI FAN COIL
